This is a draft manuscript, circulated for review and classroom use. No part of it may be reproduced, stored in a retrieval system, or transmitted in any form or by any means — electronic, mechanical, photocopying, recording, or otherwise — without the prior written permission of the author.

This book is independent. It is not affiliated with or authorized by any other textbook or its publisher; the text, figures, examples, and exercises are the author's own.

Nothing here is investment, legal, tax, or accounting advice. The models are presented together with their limitations, and no figure, example, or quoted price is a recommendation to trade. Market conventions, contract specifications, and regulatory requirements change, and several described here are changing as this is written: verify any of them against the current source before relying on it. The author makes no warranty, express or implied, as to the accuracy or completeness of the contents, and accepts no liability for any loss arising from their use.

Typeset by the author in LaTeX. Every figure is drawn in TeX from the formulas the text derives, and no artwork is imported; the cover is described on page 2.

Draft of September 30, 2026.
